Infrastructure in cloud

Programming

Tecnology

Blockchain

Web3

Juan Carlos Ojeda Gomez

I am a systems engineer who began my career as a full-stack developer after studying at San Simon University. After a few years, I decided to specialize in backend development and gained experience in infrastructure at Mercadolibre as part of the SRE team.

With my newfound knowledge, I transitioned into roles as an SRE and DevOps engineer, focusing on developing and implementing infrastructure solutions to ensure reliability and performance.

Throughout my career, I have been passionate about learning and adapting to new technologies and approaches. My diverse experience has given me a well-rounded perspective and the ability to solve complex problems from various angles.

Work experience

SRE/DevOps   Aug 2022 - Feb 2023
Disarmista, Remote in Argentina

As an SRE/DevOps engineer, I had the privilege of working with pagea.cloud as a client with:
